

Energy and Efficiency

At the stage of this award the efficient use of energy takes center. Companies that have developed technologies, processes, products, devices and services in the field of energy efficiency and have implemented projects in these areas are addressed.

We are looking for excellent projects that contribute to higher energy efficiency in the following fields:

- Buildings (heat, cooling and hot water);
- (E) Mobility;
- Energy storage;
- Heating and cooling;
- Distribution in connection with networks (electricity, heat, cold);
- Green ICT;
- Organizational measures (e.g., videoconferencing instead of travel);
- Lighting;
- Processes (e.g., by cascading use of heat, energy-efficient stand-by motors).

Topics and criteria for the category: Energie & Effizienz (pdf)

The submission deadline ended on 5 June 2015.

Submissions are no longer possible.
