

## Environment & Climate

Within the scope of this invitation to tender, projects were sought which contribute to the sustainable relief of the environment and to climate protection. In particular, companies and organizations in the fields of environmental and renewable energy technologies, which have already implemented projects in these areas, were addressed.

[Folder Umwelt & Klima.pdf](#)

### The topics:

- Climate protection: products, technologies, processes, marketing activities and services in the field of renewable energies and energy self-sufficiency.
- Cleaner Production: Practice examples and holistic concepts from the entire spectrum of environmental and climatic technology.
- Water: Total solutions, technologies and projects on the topics of efficiency in consumption, preparation and cleaning.
- Waste: services, technologies and procedures for waste prevention, waste recycling and recovery.
- Air: processes, technologies and services to reduce CO<sub>2</sub> and particulate matter.
